

PDA Compatibility

Most PalmOS PDAs work with VAD Mobile; however there are a few exceptions. VAD Mobile requires PalmOS 3.0 or newer. That means old PDAs, such as the original Palm Pilot, will not work. There are also a couple exceptions with the very newest PDAs. Due to modifications made by Sony to PalmOS 5.x, VAD Mobile will not run properly on Sony Clies running PalmOS 5.x. VAD Mobile does run on Sony Clies using PalmOS 4.x. Lastly, VAD Mobile requires a serial interface on the PDA. Some PDAs, such as the Zire and Zire 21 only provide USB interfaces. Because of this hardware limitation, VAD Mobile will not run on those PDAs.

What follows is a list of PDAs and their ability to run VAD Mobile. We have not tested on every PDA shown. In many cases, we provide an educated guess based on the PDA's physical interface and PalmOS version.

PDA Description	PalmOS Version	Supported Status	Reason (if not supported)
Palm Pilot 1000	1.0	No	PalmOS < 3.0
Palm Pilot 5000	1.0	No	PalmOS < 3.0
Palm Pilot 1MB upgrade	1.0	No	PalmOS < 3.0
Palm Pilot Personal	2.0	No	PalmOS < 3.0
Palm Pilot Pro	2.0	No	PalmOS < 3.0
Palm Pilot Pro upgrade	2.0	No	PalmOS < 3.0
Palm Pilot 1000 2MB upgrade	3.0	Yes	
Palm Pilot 5000 2MB upgrade	3.0	Yes	
Palm Pilot Personal 2MB	3.0	Yes	
Palm III	3.0	Yes	
Palm IIIc	3.5	Yes
